Learning to perform a simple test and begin to recognise when something is unfair

Who thinks they can make bigger bubbles than me?

I need:

Learning to perform a simple test and begin to recognise when something is unfair

Which product on your table do you think will make the most bubbles? Which make the biggest bubbles?

Learning to perform a simple test and begin to recognise when something is unfair

Which product on your table do you think will make the most bubbles?

Which product will make the biggest bubbles?

You need:

How will we make our test fair?

Learning to perform a simple test and begin to recognise when something is unfair

You need:

Remember to:

- put water in container
- add soap product and mix gently
- close your eyes
- blow into water using a straw

- repeat with other soap products
- order the containers depending on size / amount of bubbles

Learning to perform a simple test and begin to recognise when something is unfair

Results:

We added each of the products to water then blew air into the mixture to make bubbles.

The _____ produced the biggest bubbles.

The _____ produced the most bubbles.

We wanted to find out _____

We added the product to _____ then we used a _____ to blow air into the mixture.

The _____ produced the biggest bubbles.

The _____ produced the most bubbles.

Learning to perform a simple test and begin to recognise when something is unfair

Plenary:

Have you ordered your cups to show the results?

What have we found out?
