

Multiplication and division 2, 5 and 10

1. Count by twos.

a)  $2 \times 5 = \square$

b)  $2 \times 7 = \square$

(2 marks)

2. There are 5 fish in each bowl.

$5 \times 6 = \square$

(1 mark)

There are _____ fish altogether.

3. There are 10 coins in every bag. How many coins are there in 3 bags?

$10 \times 3 = \square$

(1 mark)

There are _____ coins altogether.

Multiplication and division 2, 5 and 10

4. Match.

(5 marks)

5. Complete the multiplication calculations for this array.

$5 \times 3 = \underline{\hspace{2cm}}$

$3 \times 5 = \underline{\hspace{2cm}}$

(1 mark)

Multiplication and division 2, 5 and 10

6.

There are six bunches of flowers.

How many bunches would there be if the amount was doubled?

Write an equation to show what you did.

$$\square \times \square = \square$$

b) How many bunches would there be if the amount was halved?

Write an equation to show what you did.

$$\square \div \square = \square$$

(4 marks)

7. Fill in the blanks.

Divide 14 ducks into 2 equal groups.

There are _____ ducks in each group.

(1 mark)

Multiplication and division 2, 5 and 10

8. Each flower has 5 petals.

There were 12 flowers in the garden.

How many petals were there altogether?

$$\square \bigcirc \square = \square$$

(1 mark)

9. Write two multiplication equations and two division equations.

$$\square \times \square = \square$$

$$\square \times \square = \square$$

$$\square \div \square = \square$$

$$\square \div \square = \square$$

(4 marks)
