DRONEdays School Visit

Dear Parents / Carers,

We have organised an exciting opportunity for our children to access and operate a selection of drones in school in class groups. The sessions will take place in school during our normal hours and will not affect break or lunchtime routines.

During the sessions, the children will use exciting drone technologies to bring coding (programming) to life. Pupils will more easily see the cause and effect of their coding decisions and this will encourage them to debug (fault find) and develop their code. The session will cover many aspects of the core computer science elements in the Computing Curriculum and provide excellent STEM opportunities.

For further information and curriculum links visit **https://www.dronedays.co.uk/**.

To cover the cost of this experience we will require a payment of £4.50 (FSM children £2.25) paid via Parentpay as soon as possible please.

Yours sincerely

Mr Stevens, Mrs Miles and Mrs Chapman

Year 5/6 Class Teachers.
