

Helpful starting point

Explore how many different mental strategies you can use to find the answer to these equations.

- *Round and adjust*
- *Partitioning into tens and ones*
- *Using number bonds to derive facts*

$$68 + 23 =$$

$$53 + 45 =$$

$$89 - 64 =$$

$$76 - 32 =$$

Challenge

Can you check your answers with the inverse?

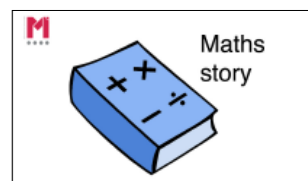

Real life maths

Complete the equations

$$65 - 32 = \boxed{}$$

$$76 + \boxed{} = 99$$

$$\boxed{} = 32 - 12$$

Now, write a maths story for each one.

Use different contexts.

Challenge: can you include measures, money **and** time?
